Cognitiwe Prevent the Food Waste With Their Predictive Vision AI Platform

TALLINN, Estonia (Business Wire)

Cognitiwe contributes to ESG using artificial intelligence; tackling the 121 million tons by the retail sector each year

Cognitiwe, un nuevo participante en el creciente mercado de la IA, evita el desperdicio de alimentos gracias a su plataforma de IA de visión predictiva. "Podremos controlar al instante la frescura de las verduras y frutas en los supermercados", afirma el cofundador de Cognitiwe, Attila Algan, y añade que "además de comprobar la frescura de los productos, el stock en las estanterías y el análisis de los planogramas, damos un nuevo impulso al sector minorista con la detección de fraudes".

[Texto completo a continuación](#)

Cognitiwe, a new entrant to the growing AI market, prevents food waste through their predictive vision AI platform. "We will be able to instantly monitor the freshness of vegetables and fruits in supermarkets," said Cognitiwe Co-Founder Attila Algan, adding that "As well as checking for freshness of produce, shelf stock and planogram analysis, we are breathing new life into the retail sector with fraud detection.

Also, in manufacturing, our technology enables quality control and detects faulty products in production line. We also offer solutions for stock management, health and safety monitoring," explained Algan, adding: "We want to position as a global brand, delivering our retail and manufacturing sector-specific products, developed using advanced technology on our predictive visual AI platform." Headquartered in Tallinn, Estonia, Cognitiwe has offices in Istanbul and Milan

Sustainability for Retail and Manufacturing

The United Nations Environment Programme (UNEP) 2021 Food Waste Index Report indicates that 13 percent of the 931 million tons of food waste generated worldwide in 2019 originated from the retail sector. "We will soon be able to use AI to reveal the environmental footprint of the retail sector's food waste that we have been able to prevent," Algan told reporters, adding further, "and thanks to data from deep learning algorithms deployed on manufacturing production lines, we will achieve materials, time and energy savings that contribute to greater sustainability". Cognitiwe's GDPR compliant products can be integrated into existing IP cameras, without the need for additional hardware investment. Because it is cloud-based, they also do not require investments in servers.

Preventing financial losses in the retail and manufacturing sector

Cognitiwe Co-Founder Mete Bayrak notes clients, "above all, by providing real time and predictive data, we help retail and manufacturing industries to reduce risks, prevent loss and improve quality." Bayrak added that they have introduced a feature to the retail product that prevents financial losses occurring as a result of the mis-scan or walk-off detection at supermarket checkouts and self-service payment points, nothing further that a 5G mobile solution for the health and safety of employees was also in its pilot phase.

Cognitiwe voorkomt voedselverspilling met hun voorspellende visie AI-platform

Cognitiwe draagt bij aan ESG met behulp van kunstmatige intelligentie; het aanpakken van de 121 miljoen ton door de detailhandel elk jaar

TALLINN, Estland – (BUSINESS WIRE) – Cognitiwe, een nieuwkomer op de groeiende AI-markt, voorkomt voedselverspilling door middel van hun voorspellende AI-platform. "We zullen in staat zijn om direct de versheid van groenten en fruit in supermarkten te controleren", zegt Cognitiwe medeoprichter Attila Algan, eraan toevoegend dat "We naast het controleren op versheid van producten, schapvoorraad en planogramanalyse, nieuw leven inblazen in de detailhandel met fraudedetectie.

Ook in de productie maakt onze technologie kwaliteitscontrole mogelijk en detecteert defecte producten in de productielijn. We bieden ook oplossingen voor voorraadbeheer, gezondheids- en veiligheidsmonitoring", legt Algan uit en voegt eraan toe: "We willen ons positioneren als een wereldwijd merk en onze sectorspecifieke producten voor de detailhandel en de productie leveren, ontwikkeld met behulp van geavanceerde technologie op ons voorspellende visuele AI-platform." Cognitiwe, met hoofdkantoor in Tallinn, Estland, heeft kantoren in Istanbul en Milaan

Cognitiwe stoppe le gaspillage alimentaire avec sa plateforme IA à vision prédictive

17

FÉV 2022

TALLINN, Estonie

Cognitiwe, un nouvel acteur sur le marché de l'IA, combat le gaspillage alimentaire avec sa plateforme IA à vision prédictive. "Nous serons en mesure d'évaluer instantanément la fraîcheur des légumes et des fruits dans les supermarchés", déclare Attila Algan, cofondateur de Cognitiwe. "En plus de contrôler la fraîcheur du produit, le stock en rayon et l'analyse du planogramme, nous donnons un nouveau souffle au secteur du détail grâce à la détection des fraudes.

Ce communiqué de presse contient des éléments multimédias. Voir le communiqué complet ici : <https://www.businesswire.com/news/home/20220216006155/fr/>

De plus, au stade de la fabrication, notre technologie optimise le contrôle qualité et détecte les produits défectueux dans la chaîne de production. Nous proposons également des solutions de gestion du stock et de suivi de la santé et de la sécurité des employés", explique Algan. "Nous voulons nous positionner comme une marque mondiale, en fournissant nos produits spécifiques aux secteurs du détail et de la manufacturier, développés à l'aide d'une technologie de pointe sur notre plateforme IA à vision prédictive". Basé à Tallinn, en Estonie, Cognitiwe dispose de bureaux à Istanbul et Milan.

New Entrant in AI Market Aims to Help Grocers Reduce Food Waste

Predictive vision platform from European startup Cognitiwe also touted for fraud detection

Lynn Petrak
Senior Editor

AI startup Cognitiwe is out with a predictive vision AI platform designed to prevent food waste by monitoring the freshness of fruits and vegetables at retail produce departments. According to the Estonian company, the AI solution can be used to determine the environmental footprint of the retail industry's food waste, including the amount of prevented waste.

Beyond quality control and slashed food waste, the system offers other benefits to retailers. Users can get more details on shelf stock and leverage the platform for planogram analysis.

Cognitiwe also added features to aid with fraud detection. The AI product is designed to help stem financial losses that occur as a result of mis-scans or walk-offs at grocery checkouts and self-service payment points.

Cognitiwe, which offers a predictive vision AI platform, was founded by Mete Bayrak (L) and Attila Algan (R).

Cognitiwe stoppe le gaspillage alimentaire avec sa plateforme IA à vision prédictive

jeu. 17 février 2022, 1:18 PM · 3 min de lecture

Cognitiwe contribue à l'ESG grâce à l'intelligence artificielle et lutte contre le gaspillage annuel de 121 millions de tonnes d'aliments dans le secteur du détail

TALLINN, Estonie, February 17, 2022--(BUSINESS WIRE)--Cognitiwe, un nouvel acteur sur le marché de l'IA, combat le gaspillage alimentaire avec sa plateforme IA à vision prédictive. "Nous serons en mesure d'évaluer instantanément la fraîcheur des légumes et des fruits dans les supermarchés", déclare Attila Algan, cofondateur de Cognitiwe. "En plus de contrôler la fraîcheur du produit, le stock en rayon et l'analyse du planogramme, nous donnons un nouveau souffle au secteur du détail grâce à la détection des fraudes.

Ce communiqué de presse contient des éléments multimédias. Voir le communiqué complet ici : <https://www.businesswire.com/news/home/20220216006155/fr/>

Cognitive vermeidet Lebensmittelabfälle durch Predictive-Vision-Plattform mit künstlicher Intelligenz

Do., 17. Februar 2022, 1:17 PM · Lesedauer: 2 Min.

Cognitive erleichtert das Erreichen von ESG-Zielen durch künstlicher Intelligenz – Reduzierung der 121 Millionen Tonnen Lebensmittelabfälle, die auf den Einzelhandelssektor entfallen

TALLINN, Estland, February 17, 2022--(BUSINESS WIRE)--Cognitiwe, ein Newcomer auf dem wachsenden KI-Markt, vermeidet Lebensmittelverschwendung mithilfe seiner prädiktiven KI-Plattform. „Wir werden die Fähigkeit besitzen, die Frische von Gemüse und Obst in Supermärkten in wenigen Augenblicken zu bestimmen“, so Attila Algan, Mitbegründer von Cognitiwe. Er fügt an: „Neben der Überwachung der Frische von Produkten, des Regalbestands und der Planogrammanalyse hauchen wir dem Einzelhandel durch Betrugserkennung neues Leben ein.“

Auch im Fertigungssektor ermöglicht unsere Technologie Qualitätskontrollen und erkennt fehlerhafte Produkte in der Produktionslinie. Zudem bieten wir Lösungen für die Lagerverwaltung sowie Gesundheits- und Sicherheitsüberwachung“, berichtet Algan. „Wir streben eine Positionierung als globale Marke an, indem wir spezifische Produkte für den Einzelhandel und die verarbeitende Industrie bereitstellen, die mit zukunftsweisenden Technologien auf unserer prädiktiven KI-Plattform entwickelt werden.“ Cognitiwe hat seinen Hauptsitz in Tallinn, Estland, und unterhält Niederlassungen in Istanbul und Mailand.
